INTRODUCTION

PRESENTATION

AB Foods is a company that helps food manufacturers to penetrate French supermarkets. But other strings are also added to our bow, such as sourcing. We research private label products and offer alternative products to industry leaders.

OUR STORY

Being a cereal bar consumer myself, I was frustrated with the limited choice available in stores. I have noticed that big brands are often expensive and contain a lot of unwanted ingredients.

OUR AMBITION

Propose a broader offer adapted to the tastes, needs and desires of French consumers which will allow a development of turnover in the cereal bars category.
